

Re: Jason Michael Smith Inc testimonial

To whom it may concern,

We have been using the Man3000DHS web based solution for almost two years. One of the features offered exclusively by Man3000 is the Livestream feature. The live stream feature is an add-on for the Man3000DHS platform.

Once the call records have been processed by Man3000 they are then sent to us. We require the call records in a specific format for integration with our Man3000DHS, with the livestream as an added feature for integration with the Argos. We need the call records because when we have to referer to a call received or made in our applications we must have the recording of the conversation as proof.

On occasion we have requested that Man3000 send us some historic call records data. We found their service sufficient and quick. Assistance is fast and friendly.

We, Jason Michael Smith Inc would highly recommend Man3000 to other customers who require integration with any third party software.
