Primedia Out of home was faced with the challenge of replacing our aging PABX system 2 years ago and with it we needed a good reporting system to monitor and report on all call transactions.

After looking around at different vendors we decided to approach MAN3000 to provide such services through their call monitoring platform and software monitoring.

The end result being great platform to pull all types of reports from daily to monthly reports, down to call comparative costs etc.

Our experience with MAN3000 has been nothing but excellent and I would recommend them to anyone looking to add decent reporting to their current PABX infrastructure
